Products

Carbon

A distinctive surface treatment on Carbon's decorative layer gives a silky and smooth tactile user experience. Its high resistance to micro-scratches and abrasion helps avoiding surface distortions and gives a lasting impression. In the event of a light scratch, the surface can be cleaned with a soft cloth to get it back to its original form. Carbon is extremely matt and near to zero gloss with intensive light absorbance and homogeneous color dispersion.

Metals

A finish with real brushed metal layers as the decorative face with a wide color selection.

Lab Top

Lab Top is ideal for chemical and stain resistant laboratory environments. The panels have a density of 14.5 kg/m2 | 2.97 lbs/ft2 and are impressively strong with a high impact and moisture resistance and a remarkable structural ability. The panels meet all requirements of EN-48:2005 and ISO 4586. Its surface is tested for 33 different chemicals including acids, bases, biological stains, halogens, salts, organic chemicals and solvents. There is no visible change of color, gloss level, blistering, corrosion or any distortion on its surface when in contact with these chemicals. Lab-grade is certified by SEFA and can be used in chemical, medical, scientific photographic laboratories, clean rooms, salons & SPA, nursing stations, etc.

Digital Print

From unique custom designs, printing high quality pictures, printing texts to corporate logos, Digital Print is a way creative ideas can be transformed into contemporary architectural solutions.
